May 30 1867

Lis'ianthus tuberiferus flowers a little later than Robinia

5 or 6 leaves of flowering branch in 2/5 disposition

Deciduous bract, mucronate & emarginate or bilobed, close under the terminal flowers.

Apparently 3 cycles of sepals (6) and 2 petals (2) but properly speaking only one cycle of 10 (including the bract at first apparently containing the 2/5 cycle) the leaves but soon change into another, so that none of the 10 leaves is exactly opposite the other.

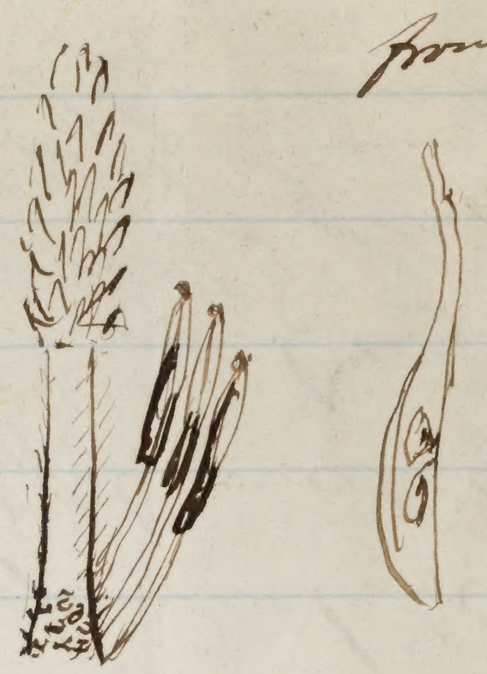
Magnolia fusoata ? Feb 29 1876

"sweet scented Magnolia"

from New Orleans



9

Evergreen glossy leaves 2" long

1" wide, oval obtusely acuminate

now only along the midrib below

slightly rusty-hairy-

petiole short - rusty downy -

stipules deciduous, as in the family

rusty downy

Flowers a little onesided axillary, on very short

brown downy petiole,

two valvate exterior sepals, one above and one below

(stipules?) a third one apparently with midrib

backwards not open, circular - closed - all three

rusty brown downy

6 reddish fragrant petals in 2 series

oval nearly equal in size about 1 inch long

Gynoecium a slender stipe with the 30 stamens

at base, in several series - probably 5, outer shorter.

Stipe only hairy, with 30-40 carpels, each with 2 ovules

stigma elongate, linear

GEORGE ENGELMANN PAPERS
MISSOURI BOTANICAL GARDEN

Dear Doctor

Yr doubtless see this have my oaks etc. So that yr may feel & sum Red tape did not beat me out. I only want to say that I will willingly trade through any quantity of it to serve yr.

Again Papa has received yr which, thanks. I am sure Mr Wheeler cant help puling that he has in it - all due credit. My School has already 40 boys engaged. I am aware of the responsibility incurred but I can things well systematized. Will send yr a prospectus & yr can tell more about the thing

Yr Son
